As mathematical characteristics: only in mathematics. there is no significant correction - there is only expanding. For example. once the Greeks developed the deductive method. what they do. they are right. always right. Euclid incomplete. his work has been a huge expansion. but only extended without the need to be corrected. His theorem. Theorem to today are effective. History of Mathematics (upper and lower revision) (fine) by Carl B. Boyer. Jutta C. Metz Bach book. History of Mathematics (upper and lower revision) (fine) to the development of mathematics for thousands of years concentrated as this chronicle. From the Greeks to Godel. the mathematics has been brilliant. celebrity men. concept tides fell at clearly visible. Moreover. even though the track is the development of European mathematics. but the author does not neglect the contribution of Chinese civilization. Indian civilization and Arab civilization. There is no doubt that this book is a classic about mathematics and the creation of the single-volume history of the discipline mathematicians writings. Both academic. . Another readability. Our book of historical facts. concepts. beautiful illustrations. as well as to lead us through the development of mathematics in the long river of gurus impressed and decided to put it into China. to satisfy the Chinese love of math. respect for the spirit of science readers. The author Contents...
