PHILOSOPHICAL LANGUAGES IN THE SEVENTEENTH CENTURY: DALGARNO, WILKINS, LEIBNIZ

DOWNLOAD

Springer, Netherlands, 2012. Paperback. Book Condition: New. 240 x 160 mm. Language: English . Brand New Book ***** Print on Demand *****.This book discusses three linguistic projects carried out in the seventeenth century: the artificial languages created by Dalgarno and Wilkins, and Leibniz's uncompleted scheme. It treats each of the projects as self-contained undertakings, which deserve to be studied and judged in their own right. For this reason, the two artificial languages, as well as Leibniz's work in this area, are described in considerable detail. At the same time, the characteristics of these schemes are linked with their intellectual context, and their multiple interrelations are examined at some length. In this way, the book seeks to combine a systematical with a historical approach to the subject, in the hope that both approaches profit from the combination. When I first started the research on which this book is based, I intended to look only briefly into the seventeenth-century schemes, which I assumed represented a typical universalist approach to the study of language, as opposed to a relativistic one. The authors of these schemes thought, or so the assumption was, that almost the only thing required for a truly universal language was the systematic labelling of the items of an apparently readily available, universal catalogue of everything that exists. Softcover reprint of the original 1st ed. 2004.
