THE ORGANIC CARBON CYCLE IN THE ARCTIC OCEAN

Springer Okt 2013, 2013. Taschenbuch. Book Condition: Neu. 270x193x20 mm. Neuware - The flux, preservation, and accumulation of organic carbon in marine systems are controlled by various mechanisms including primary production of the surface water, supply of terrigenous organic matter from the surrounding continents, biogeochemical processes in the water column and at the seafloor, and sedimentation rate. For the world's oceans, phytoplankton productivity is by far the largest organic carbon source, estimated to be about 30 to 50 Gt (10 tonnes) per...

Reviews

This is an awesome publication I have at any time read. Of course, it is playful, still an interesting and amazing literature. You will like just how the author writes this book.

-- **Prof. Herta Mann**

Most of this ebook is the ideal PDF readily available. It was actually written quite flawlessly and valuable. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Prof. Jordy Kihn**
