The fundamental problems of the shale oil industry are solved. Details will have to be worked out, and apparatus and manipulation will have to be modified to meet the peculiarities of our various American shales. In the opinion of the writer, the retorting presents fewer difficulties than does the refining. But many of the refining problems will vanish if the retorting is done scientifically and in obedience to chemical laws. It must not be supposed that the same methods of refining can be successfully applied to oils which are chemically very different. If this is kept in mind and the chemistry of the unsaturated hydrocarbons is mastered, the refining problems will very soon yield to chemical skill. LABORATORY STUDY OF COLORADO SHALES HISTORICAL SKETCH At the present time the distillation of shale for oil and the various by-products is an important industry in Scotland, France,...
